SNMMI maintains a long-standing commitment to supporting patients, partnering with patient advocacy organizations on issues of mutual interest and priority, and providing educational programs for consumers to help them understand molecular imaging and the constructive role it can play in both diagnostic and therapeutic settings. For the third year, the SNMMI Patient Advocacy Advisory Board has developed a "Patient Program" to address key topics of interest to the patient and patient advocacy community. This program provides a unique opportunity to network with passionate advocates and leading experts in lymphoma disease, neuroendocrine tumors, and dementia.

Welcome LETTER

Welcome to the 2013 Patient Education Day at the SNMMI Annual Meeting

Dear Patients and Caregivers,

On behalf of the Patient Advocate Advisory Board for the Society of Nuclear Medicine and Molecular Imaging (SNMMI), I'd like to personally welcome each of you to Patient Education Day. Nuclear medicine and molecular imaging is a field that many are unfamiliar with until a medical diagnosis necessitates that they learn about it. Over the course of the SNMMI Patient Education Day, we hope to share with you in more detail what nuclear medicine and molecular imaging is and the exciting advances that are taking place in the field.

We have created an agenda that will help you better understand the history, technology, safety and advances in the field of nuclear medicine and molecular imaging. The day's learning opportunities include a keynote speech from a patient on his journey with nuclear medicine and molecular imaging, general education sessions, and breakout sessions on the latest advances for lymphoma, neuroendocrine tumors, and dementia. We'll also take a guided tour of the exhibit hall to get a first-hand look at the science and technology behind nuclear medicine and molecular imaging and therapy. Finally, all attendees are invited to attend a reception in the SNMMI Poster Hall where you can speak directly with those who are presenting research at the meeting.

The SNMMI Patient Advocacy Advisory Board is dedicated to educating patients about nuclear medicine and molecular imaging so that they can make the best health care decisions for their individual needs. Throughout the day, please feel free to ask questions of any of the Patient Advocate Advisory Board members or SNMMI staff. We are here to help facilitate a day of education that will make us all better informed.

Sincerely,

Josh Mailman
Chair, SNMMI Patient Advocacy Advisory Board
