Interview Study- Patient Feedback Needed

Interface Analysis Associates, a consumer health research company, will be conducting interviews with individuals diagnosed with **Neuroendocrine tumors**. You may also have experience taking **Lanreotide or Sandostatin**.

We want your opinion on a future treatment delivery device. You will be asked to **SIMULATE** use of a new device and asked to help evaluate its instructions. You will **NOT** be asked to take any medication. **This is not a clinical drug study.**

Our research helps to create patient-centered products that are safer, easier to learn, and more enjoyable to use. Your feedback and

Non-Clinical
Study

If you know someone who is undergoing current treatment please reach out to us today!

\$150
